REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or suggest the claimed method for manufacturing an optical waveguide refractive index grating having a desired grating pitch, the method comprising the steps of translating the waveguide relative to the writing beam at a velocity $v(t)$; modulating the intensity of the writing beam as a function of time at a frequency $f(t)$, wherein the step of modulating the intensity of the writing beam comprising the step of varying the pitch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Segawa et al and Laming et al disclose different methods of writing a Bragg grating on a photosensitive optical waveguide. However, these references fail to disclose the steps recited in the allowable subject matter above.

The prior art submitted by applicant has been considered. See attached copy of form PTO-1449.
